Dear Students,

As you prepare for your **final project presentation**, please ensure that you include the required design diagrams based on your project type.

The required diagrams are as follows:

1 Fully Embedded System Project

You are required to present:

- **Block Diagram**

The block diagram should clearly show all hardware components and how they interact within the system.

2 Mixture of Embedded and Software Project

You are required to present:

- **Block Diagram**
- **Use Case Diagram**

The block diagram should show hardware structure, and the use case diagram should illustrate system users and their interactions with the software components.

3 Software-Based Project

You are required to present:

- **Use Case Diagram**
- **Flowchart Diagram**

The use case diagram should show system actors and interactions, while the flowchart should explain the process flow or system logic.

4 AI / Machine Learning Project

You are required to present:

- **System Architecture Diagram**
- **Use Case Diagram**

The architecture diagram should show data flow, model training, deployment structure, and system components.
