PROJET TITLE: **DEVELOPMENT OF LOGISTICS ANALYSIS TOOL FOR FUEL PRICES**

PANNEL COMMENTS;

- Project should be specifically based on fuel price predictions, and not other transport factors.
- Add gas prices prediction as it is now the source of fuel for vehicles.
- Specify the users of the system (fuel and gas station operators, transport and logistics service providers)
- Remove heatmap as the data visualization in the system
- Conduct a literature review
- Take more recommendations from my project supervisor
